My name is Nicole; I'm a Digital Media Manager at NAMIC looking to join Silverttech as your new Front End Developer. I have over eight years of experience developing responsive websites and working with content management systems.

Shortly after getting my design degree, I joined NAMIC as a web design specialist working heavily with customers to design logos, create email communications and design and develop custom Wordpress websites. In 2017 during a company-wide reorganization, my small team was merged with a larger department. In that time, I adapted to a changing work environment being utilized at times as a designer, front end developer, customer advocate, and small team lead. As my position continues to evolve, I have been desiring to move to a more focused position in front end development with future aspirations of becoming a senior member of a talented team of developers

I believe my years of experience will make me a great asset for Silverttech's team. Working as an individual, team member and team lead will help me adapt to your environment quickly. I am a fast learner and committed to delivering projects in a reasonable time frame by setting realistic work goals and expectations.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.
